**LET'S ACHIEVE YOUR
VISIONS THROUGH
VISUALS!**

WHY NEED GRAPHIC DESIGN?

Based on my corporate experience, there's a high need for synchronized communication to meet strategies and goals. You as manager may have a promising visions and strategic plan that will leverage your organization to the next level. However, your presentation did not work. Take a second look at your materials, it could be overloaded with narratives and bullets, layout is scattered and color scheme is flashy. This is where graphic designers come into scene.

Graphic designers are gifted with visuo-spatial talents. The data you give them are processed into visuals which are easier to understand by your audience. It also adds mass appeal as beautiful graphics are the pleasures of the eyes giving sensation. Graphic designs can have the stakeholders approve your projects worth million, implement an organizational process and even close an audit issue!

SERVICES

- Technical Diagrams
- Visual Strategic Plan and Process Design based on ITIL and COBIT
- Infographic Mgt of Information Systems Report

ABOUT OX

Ox has a wonderful 10 years of corporate and outsourced IT experience. She worked in Phillipine National Bank, Eastwestbank and Safeway Philtech.
